Oxford Standing Seam

A cladding material offering contemporary aesthetics & appeal.

Commercial* Industrial* Residential

- Roll-formed 26 Ga. steel mitigates oil canning*
- Hidden fastener system ensures a clean, modern finish
- "Snap lock" connection, eliminates mechanical seams
- Mobile roll-former allows manufacturing at the construction site
- Made In Canada with domestic steel**

*Oil canning is not considered a defect

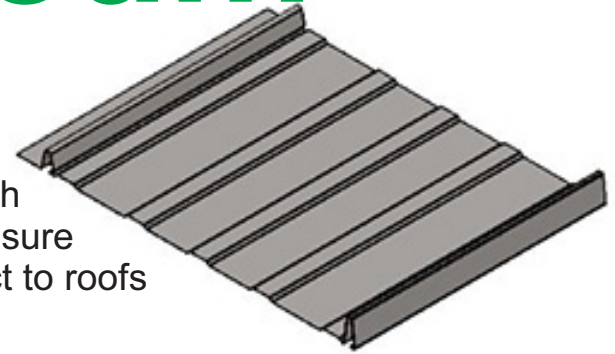

**unless otherwise specified

Oxford

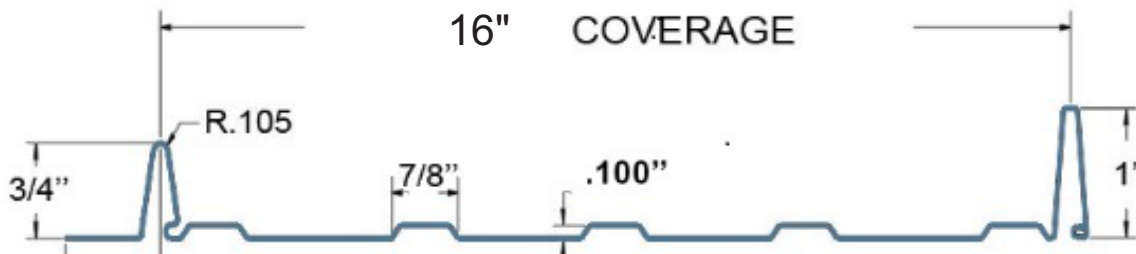

Standing Seam

Product Information

Oxford standing seam requires a clean, flat surface, such as plywood. Avoid application directly to strapping to ensure a proper installation of this product. Applying this product to roofs with a pitch less than 2/12 is not recommended.

All-Star Metals recommends using a 3/8 inch foam backer rod applied on the centre to the reverse side of each panel before installation (this step of the installation process ensures a slight convex pressure to the face of each panel), another technique used to mitigate oil canning.

TEXTURED DEEPA

Cool Blue Grey	Graphite Grey	Chrome Green
Sepia Brown	Oxide Red	Ebony
Chocolate Brown	Terracotta	

EARTH TONES

Dark Brown	Metro Brown	Charcoal
Slate Grey (26G)	Coffee Brown	Black
Tan	Pebble Khaki	Regent Grey

ACCENT COLOURS

Burgundy	Heron Blue	Bright Red
Tile Red	Slate Blue	Dark (Barn) Red
		Dark (Melchers) Green

WHITES & OFF-WHITES

Bright White	White White	Stone Grey
Bone White	Ivory	

NATURAL FINISH

Galvanized
